

BRAND TO BLOCKCHAIN SOLUTIONS.

ONE AGENCY DELIVERING BRAND TO BLOCKCHAIN SOLUTIONS.

Gluu has a team of expert marketers, blockchain developers, influencers and creative thinkers whose collective focus is to deliver a better brand to blockchain solution to our clients.

CONTRACT

SMART CONTRACT DEVELOPMENT

Smart contracts are protocols that determine the ways in which customers can interact with your business. They are immutable which means that once the rules are defined, they cannot be changed by anyone.

Interacting with smart contracts gives you the full benefits of the blockchain. The immutable method of storing transactions means you can trust the information to always be correct. Our specialist developers are here to make sure your contract is secure.

BRIDGING

BRIDGING

Unifying blockchains to allow your dApp to exist on compatible networks.

Our team create bridge platforms, allowing tokens to be sent onto their preferred blockchain with faster transactions or lower fees.

This means that you can continue to run your business on the intended network but extend your DApp to ERC-20 compatible networks increasing your exposure to extended audiences.

BRA NDI NG

BRANDING

**We build brands that engage and inspire growth
with your audience.**

We believe the foundation to successful audience engagement starts with a strong brand. It engenders confidence from shareholders, helps attract partnerships, inspires customer engagement and unifies your audience.

AUDITING

SMART CONTRACT AUDITING

Our smart contract audit ensures that the onchain code is devoid of bugs or security vulnerabilities.

We deliver a detailed analytical report with vulnerabilities, mitigation guidance and options for continuous verification

DESIGN SERVICES

Ensuring your product is brand led, intuitive and user friendly.

We believe that everything stems from the brand whether that's visual or values led, our team of UI/UX experts are on hand to deliver solutions that works for the end-user and retains the brand continuity throughout.

DE VEL OP

SOFTWARE DEVELOPMENT SERVICES

Our team of experts build secure, complex integrations between multiple systems to handle deposits, transfers, transformation of one digital asset into another, and more.

~~STAKING~~

STAKING

Staking stabilises the floor price of your token.

Our white-labelled staking platforms are scalable and customisable solutions designed to adapt to your business needs.

Allowing your customers to stake in your token means they earn rewards while securing their tokens in a contract where they can't be sold. Staking can be done over any period and you can set how many tokens are in the rewards pool.

WE ARE **SERIOUS** ABOUT BUILDING CRYPTO BRANDS.

Our mission is to provide crypto products and services that breakdown barriers to stimulate wider adoption.

Pushing the boundaries on what's achievable and becoming a single dedicated team focused on delivering your project from start to finish.

BRAND TO BLOCKCHAIN SOLUTIONS.

WE BUILD **SERIOUS**
CRYPTO BRANDS
